ABOUT ME

Software Engineer and AI Developer engineering the bridge between high-throughput backend systems and intelligent machine learning models. Adept at turning complex architectural problems into elegant, production-ready code.

EXPERIENCE

Ledgercross

Software Developer Trainee

Dhaka, Bangladesh

May 2026 – Present

- Built MERN-based business systems and authored 218 automated pytest cases for backend workflows.
- Engineered AI invoice processing pipelines using Python, FastAPI, Mindee OCR, PostgreSQL, and Redis Streams.
- Developed FUMAK, a client inventory and POS system with Android barcode scanning and stock management.

Bangladesh Software Solution (BSS)

Software Engineer Intern

Dhaka, Bangladesh

Feb. 2026 – Apr. 2026

- Developed responsive frontend interfaces utilizing HTML5, CSS3, and modern JavaScript (ES6+).
- Integrated frontend layout structures with backend RESTful APIs with robust error handling.
- Collaborated in agile development workflows utilizing Git for version control and system deployment.

PROJECTS

InvoicePilot (Ledgercross Product) | Python, FastAPI, Mindee OCR, PostgreSQL, Redis

- Built an AI invoice processing microservice for OCR extraction and structured data generation.
- Implemented invoice normalization, validation, duplicate, fraud, and anomaly detection rules.
- Developed an 11-stage pipeline with Redis Streams for synchronous and asynchronous processing.

FUMAK Inventory & POS System (Client Project) | Kotlin, Android, Next.js, PostgreSQL

- Built an inventory and POS platform with Android barcode scanning and a Next.js web application.
- Implemented real-time product lookup, stock management, checkout, and sales analytics.
- Integrated ML Kit, Prisma, Neon PostgreSQL, and Cloudflare R2 for core workflows.

LedgerTurf | React, Node.js, Express, MongoDB Atlas, Redux

- Built a full-stack MERN turf booking ecosystem featuring geo-spatial MongoDB 2dsphere indexing.
- Eliminated booking race conditions and scheduling conflicts via atomic database query validations.

FinBERT Financial Sentiment Analysis | PyTorch, Hugging Face, NLP

- Fine-tuned domain-specific transformer models (FinBERT) to classify sentiment in financial text datasets.
- Implemented comprehensive NLP preprocessing pipelines for tokenization and model optimization.

Face Recognition System | Python, OpenCV, LBPH

- Developed a real-time face recognition system leveraging OpenCV and Local Binary Patterns Histograms (LBPH).
- Engineered efficient image processing pipelines for accurate feature extraction and identification.

EDUCATION

American International University-Bangladesh (AIUB)

Bachelor of Science in Computer Science and Engineering | CGPA: 3.92/4.00

Dhaka, Bangladesh

Sep. 2022 – Apr. 2026

BAF Shaheen College Dhaka

Higher Secondary Certificate (HSC), Science | GPA: 5.00/5.00

Dhaka, Bangladesh

June 2019 – Dec. 2021

Kurmitola High School & College

Secondary School Certificate (SSC), Science | GPA: 5.00/5.00

Dhaka, Bangladesh

Jan. 2017 – Feb. 2019

THESIS & RESEARCH

Neuro-Screen: Hybrid AI Framework for Cognitive Impairment Detection | *CatBoost, PyTorch*

- Engineered a dual-path hybrid ensemble fusing gradient boosting classifiers and deep neural networks.
- Achieved state-of-the-art performance with 95.20% accuracy and 0.982 ROC-AUC across 2,237 student records.
- Identified mental fatigue, stress frequency, and sleep quality as primary predictive drivers of cognitive decline.

CERTIFICATIONS SPECIALIZED TRAINING

IBM Full-Stack JavaScript Developer Professional Certificate | *Coursera*

- Completed comprehensive full-stack development training covering frontend and backend microservices.
- Built capstone projects including interactive shopping applications and RESTful review systems.

Blockchain, Ethereum & Solidity Development | *Udemy*

- Mastered smart contract programming, decentralized applications (DApps), and EVM mechanics.

TECHNICAL SKILLS

AI & Machine Learning: PyTorch, Hugging Face, Scikit-learn, OpenCV, CatBoost
Programming Languages: Python, Java, C/C++, C# (.NET), SQL, TypeScript, JavaScript, Solidity
Web Development: React, Next.js, FastAPI, Node.js, Express, HTML5, CSS3
Backend & Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Redis Streams, Qdrant
Tools & DevOps: Git, Docker, Celery, BullMQ, Jupyter Notebook, Cloudflare R2

HONORS & AWARDS

5x Dean’s Award Recipient & AIUB Merit Scholar | *AIUB* 2022 – 2026

- Awarded 70% tuition waiver for academic excellence alongside 5 consecutive Dean’s Award recognitions.

The Duke of Edinburgh’s Bronze Award | *AIUB* 2025 – 2026

- Completed rigorous requirements encompassing community service, skill development, and expedition tasks.

LEADERSHIP EXTRACURRICULAR ACTIVITIES

Student Activity Coordinator | *Space Innovation Camp* 2022 – 2025

- Led robotics and UAV engineering workshops mentoring over 500 students.

Public Relations Representative | *WRO Bangladesh* 2023 – 2024

- Coordinated media communications and logistics for national robotics competitions.
